Technical Skills

Programming Language

- Python
- Java
- Javascript

Frameworks

- ReactJs
- NodeJs
- ExpressJs

Database

- MySql
- MongoDB

Development Tools

- Github
- AWS(EC2, S3, Lambda)

Education

Higher Secondary Certificate:
Kongu National Matriculation Higher Secondary School, Nanjanapuram.
Percentage: 77.33%

Secondary School Leaving Certificate:
Kongu National Matriculation Higher Secondary School, Nanjanapuram.
Percentage: 87%

Bachelor Of Engineering:
Computer Science and Engineering
Kongu Engineering College
Perundurai CGPA: 7.32

Certifications:

- MongoDB Associate Developer Certificate(NodeJs)

Areas of Interest

- Frontend Development
- Database Management System
- UI/UX design

ASHWANTH S

in <https://www.linkedin.com/in/ashwanth-s-010776308/>

Career Objective

Aspiring Frontend developer passionate about building intuitive, responsive, and user-friendly web interfaces. Skilled in MERN Stack with strong UI/UX understanding to create seamless digital experiences. Focused on clean code, Performance optimization and solving real-world problems through modern web technologies.

Experience

Freelance - Frontend Developer (Pet Adoption System)

- Built an interactive React.js frontend for Pet Adoption System with features such as pet search, filtering, and adoption requests.
- implemented reusable components and optimized rendering for faster UI Performance.
- Worked with MongoDB to display real-time data for pets and adoption status.

Achievements

- Won 3rd prize in paper presentation on the topic of 'Health Rate Monitoring Devices in Kongu Engineering College.
- Won 3rd prize in logo sculpture event in Kongu Engineering College.

Projects

WORKFORCE MANAGEMENT SYSTEM

Developed an end-to-end workforce management platform using HTML, CSS, MongoDB, and Express.js to streamline employee tracking and task allocation. Built modules for attendance management, role-based access, and workflow handling, improving operational coordination and reducing manual effort.

HOSTEL UTILITY SERVICE

Developed a Hostel Utility Service Management system using the MERN stack, including features for complaint logging, service tracking, and admin oversight. Implemented secure data handling, real-time updates, and intuitive dashboards to enhance communication between students and hostel administration.

UI/UX Projects Section

Fitness App Login UI Design
